

ADDITIONAL FEATURES ARE NOW AVAILABLE IN THE DATABUILD SOFTWARE SUITE FROM JULY 2020

DATABUILD 2.63

Databuild 2.63 builds upon the recent 2.62.2 release with the primary focus around efficiency and usability improvements. There is also 25+ customer reported issues that have been fixed improving software reliability and performance.

RECIPE MAINTENANCE

Should items become superseded or are no longer available, users can now substitute or delete these items across a range of recipes. Similarly, new items can be added to a range of recipes also. This adds major time saving benefits to recipe creation & maintenance.

CUSTOMISED LAYOUTS FOR CANCELLED ORDERS

When sending a cancelled order, users can now customise the layout of the cancelled order document. This allows the user to add text or graphics to clearly distinguish it from a regular order. The cancelled order layout will automatically be used when a cancelled order is sent, saving the user from having to select the cancelled order layout, and re-selecting the regular order layout once sent.

FEATURE	BENEFIT
Recipe ingredients / items can now be added, replaced or deleted over a range of recipes.	Should items become superseded or are no longer available, users can now substitute or delete these items across a range of recipes. Similarly, new items can be added to a range of recipes also. This adds major time saving benefits to recipe creation & maintenance.
Cancelled order layouts can now be customised.	When sending a cancelled order, users can now customise the layout of the cancelled order document. This allows the user to add text or graphics to clearly distinguish it from a regular order. The cancelled order layout will automatically be used when a cancelled order is sent, saving the user from having to select the cancelled order layout, and re-selecting the regular order layout once sent.
Workup & Specification text font can now be customised on reports.	The workup & specification font used on reports will now be identical to the font the user has specified on the screen. This allows for increased readability, and for text to align nicely if using tabs or other spacing to create tables of text.
The job budgets screen can now show total figures for a range of jobs, and also allow individual cost centre budgets to be locked or unlocked.	Total budget, cost, forecast and invoiced figures can now be displayed and printed for a range of jobs, as well as allowing individual cost centre budgets to be locked or unlocked across those jobs.
